About Us

We are a systems integration company specializing in delivering enterprise information technology solutions. We bridge infrastructure, applications, tools and processes with strategic objectives for improving operational efficiency, security, and ensure compliance with industry and government regulations. Over the last 12 years, we have assessed, implemented, and supported mission essential, and mission-critical systems across Law Enforcement, Diplomacy, Intelligence and National Security domains. Our credentials include the Secretary's Award for Small Business Excellence from the Department of State.

Core Competencies

Enterprise IT Systems Integration

Integration of on-prem, cloud, and hybrid IT environments, unifying legacy systems with modern platforms to enable seamless data flow and system interoperability.

Infrastructure Modernization

Infrastructure virtualization and consolidation of compute, storage, and network layers, using software-defined and cloud-native architectures.

Process Optimization & Automation

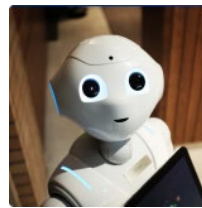

Business process re-engineering and workflow automation using robotic process automation (RPA), AI, and low-code/no-code platforms.

Experience

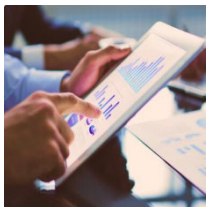

DevSecOps Design and Implementation

We transformed how the Bureau of Consular Affairs manages integration and deployment of 100+ applications across dozens of contractors and technologies by building a scalable DevSecOps pipeline with security, quality and automated testing components.

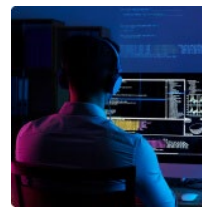

Digital Asset and Content Management

We built a digital assets and content management solution on the Adobe Experience Manager platform for the Bureau of Diplomatic Security to enable collaboration and production of real-time security information.

24 / 7 Infrastructure and Network Support

At Bureau of Arms Verification and Compliance (AVC), we provide 24/ 7 infrastructure and network support spanning US and Europe locations. Our contribution to building a COOP site helped AVC meet its mission needs during COVID-19 pandemic.

Mission Critical System Support

At the United States Patent and Trademark Office, we supported the Unisys Mainframes based Trademark database. The Trademark database is a mission critical system providing information interface to all Trademark applications.

At Bureau of Arms Verification and Compliance, we modernized systems for exchanging information between Department of State, Department of Defense and European allies. We supported deployment across 53 countries with automated language translation

At Bureau of Diplomatic Security, we modernized mission critical Task Tracking system to meet the needs of 1000's of users for responding to Bureau taskers. Key features included co-editing documents and collaboration across division and office levels.

Services

System Implementation

Agile DevSecOps based approach for building mission systems using Secure Development Lifecycle.

Infrastructure Operations

24 / 7 services to ensure systems are running smoothly, securely, and efficiently with 100% SLA compliance.

Advisory and Assessment

Stay informed about the state of your systems with actionable reports for improvement and risk mitigation.
